

Raggeds Trail #820

14 Miles (one way)

The Raggeds Trail is managed for two types of use. The southern portion is for ATV and motorcycles and the northern portion is for non motorized use.

The trail begins climbing through dense aspen and scattered oak brush, crossing Deep Creek (dangerous in late spring) to Williams Creek Reservoir. Campsites abound along the shore. From here, the route is a gradual ascent and descent through open aspen stands and oak brush. It climbs steeply out of Buck Creek, then follows roads through private land. The Raggeds Trail is little used for its entire length, with the heaviest use from fishermen and day hikers into Williams Creek and Tomahawk reservoirs. There is good fishing here as well as in Deep Creek. Good views of the Raggeds, Buck Basin and Chair Mountain exist along the upper portion of the route.

Trailhead Parking: The Raggeds Trail #820 begins at the end of Forest Service Road #795. This is a very rough road and hard to pull a trailer up, especially if it's wet. Park at the ATV parking at Erickson Springs Campground, unload there and ride to FSR #795 to access the trail.
